

Pair Fungicides with CROP+ for Even More Bushels Let Fungicides Go To Work On Diseases And Let Crop+ Alleviate Crop Stress

A VERDESIAN NUE™ SOLUTION

Developed with Cytozyme's proprietary technology, CROP+ is a nutritional product designed to support plant tolerance to abiotic stress, improving yield and quality of crops. Its multiple modes of action and multi-disciplinary approach help plants treated with CROP+ perform better.

CROP STRESS

Drought

Excess Moisture

Heat

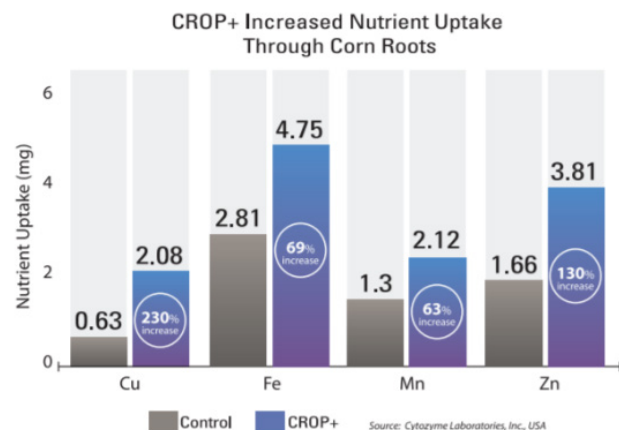

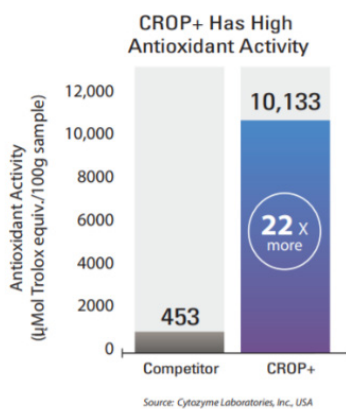

Cold

CROP+

- Reduces abiotic stress
- High antioxidant activity
- Reduction in damage from free radicals in cells
- Upregulates genes involved with stress response
- Stimulates plant metabolism at critical phenological stages of development
- Contains naturally chelated Micronutrients (cobalt, copper, iron, manganese, molybdenum)
- Overall improved plant health

Fungicide not available?

Use Crop+ alone for stress mitigation and added bushels

Rate: 8 oz/acre

Corn

Soybeans

Alfalfa
